Concerning a COVID-19 Outbreak at a Subsidiary of the Company

SEIKOH GIKEN Co., Ltd.  
Administration Department

In the period from November 21 to December 7, five temporary workers working at the head office factory of our subsidiary Fuji Electronics Industries Co., Ltd. (Surugaku, Shizuoka City, Shizuoka Prefecture) were found to have been infected with COVID-19. We sincerely apologize for any concern this may have caused local communities and related parties.

It has been established that the five temporary workers work at a designated workplaces inside the factory and are not engaged in work involving direct contact with local communities and related parties.

Moreover, for employees who share the designated workplaces concerned, PCR tests have been administered for those with relevant health complaints and antibody tests for others. As of today, all employees except the five temporary workers have tested negative.

We are addressing this outbreak under the guidance of the health center by taking appropriate countermeasures such as disinfection of the workplaces concerned to prevent a further spread of the infection.

The Group will continue to take necessary measures in cooperation with related organizations, giving top priority to preventing infection spread and ensuring the safety of local communities, related parties, and employees of the Group.

Further notice will be given promptly when required by circumstances. Your understanding is sincerely requested and appreciated.
